To whom it may concern,

Southern Ionics Minerals, LLC announces the resignation of Ron Rose as President effective June 30th. We cannot thank Ron enough for his efforts in building Southern Ionics Minerals from the ground up. Ron was responsible for developing great relationships with land owners, government and non-government organizations, as well as recruiting a world class team to successfully build state of the art mining and mineral separation operations in Southeast Georgia.

Ron is leaving Southern Ionics Minerals to pursue another exciting opportunity in the minerals industry. Now in full operation, we have a competent and confident management team that will continue moving the business forward. Milton Sundbeck, CEO and owner of Southern Ionics, will assume day to day management of the business.

Everyone at Southern Ionics Minerals wishes Ron the best of success in his future endeavors.
